GREENATHON IN VET

OUR MISSION

Empowering Educators to Deliver Green Skills and Entrepreneurship Training

The 'Greenathon in VET' project is an Erasmus+ vocational education and training initiative. Partners from Slovakia, Hungary, Romania, Ireland, Malta, Turkey, and Portugal joined forces to develop new learning and training materials for students and teachers.

'Greenathon in VET' aims to equip VET students with green entrepreneurial skills and prepare them to participate in green ideathons – innovation competitions focused on sustainability. The project also supports VET teachers with teaching methodologies and materials to implement this training effectively.

The project has developed and piloted key educational resources designed to support VET institutions in organising green ideathons. Watch our Videos on Youtube and follow our social channels on Facebook and Instagram!

GREENATHON IN VET

OBJECTIVES

Greenathon in VET seeks to achieve the following objectives

01

Develop sustainability awareness

02

Foster green entrepreneurial skills

03

Promote critical thinking and innovation

04

Enhance teamwork and participation

05

Prepare students for ideathon participation

06

Support Real-World Applications

Through a comprehensive suite of resources including workshops, an e-learning platform, and the Greenathon guidebook students gain the practical green skills needed to launch sustainable initiatives in their future careers or in their community.

Simultaneously, educators are equipped with the necessary tools to guide this learning path, ensuring graduates meet the labour market's growing demand for professionals.

A GLANCE AT OUR RESULTS

GREENATHON IN VET

The Greenathon E-Learning Platform: A multilingual interactive hub featuring five comprehensive modules, and instant student assessment tools to equip VET students with the sustainability knowledge and practical skills.

www.greenathon.eu/login

Greenathon in VET Course Modules

Module 1: Major Challenges of Sustainability and Climate Change

Module 2: Main Green Solutions

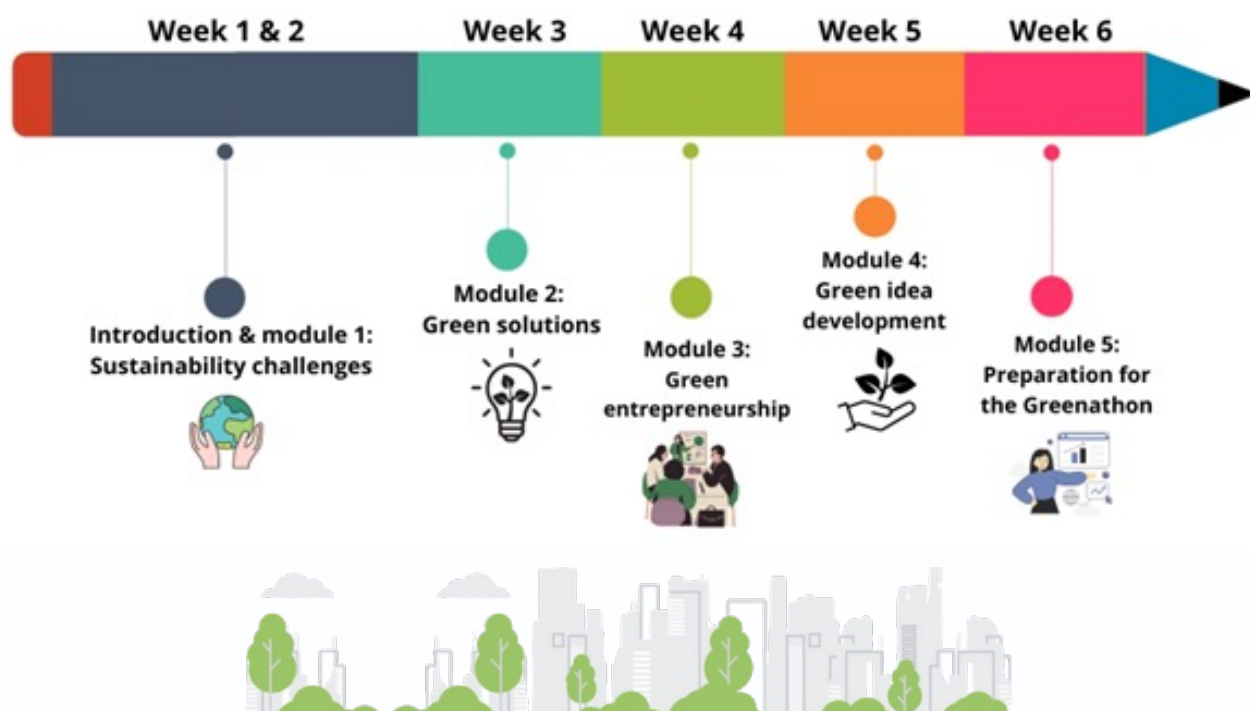

Module 3: Introduction to Green Entrepreneurship

Module 4: Preparation for Greenathons

Module 5: Evaluation and Future Steps

Student Assessment

The Greenathon training is organised into five key modules, each designed to build specific competences related to green entrepreneurship. Now available in six languages, these teaching modules have been refined based on feedback from pilot activities to ensure they are clear, practical, and classroom-ready. Below is a suggested timeline that teachers can use as a starting point. Although teachers are encouraged to cover all five modules and the Greenathon event, this structure can be adjusted depending on the needs of each classroom.

MORE RESULTS FOR YOUR CLASSROOM
